Since 1996 with only stone tool number one the author is fascinated of this place. Number 2,3 and 4 lift in 2010, number 5 and 6 in 2016, Number 7 to 15 in 2017. The author is thinking number 7, shell-flint fossil, should be a firetool. Used by differently stone age cultures, various techniques, in running of (10)thousands of years.

Well, in generally it is possible a view back to Eem-age, the interglacial for 10.000 years around 122.000 years ago in middle europe. Warmer than topical, Eem period with forest elephants. Any tools are produced directly and perfekt to holt and use by the right hand, so these stones should doing possibly a new view for stone age artifakts. It was not easy to reach the responsible Experts, the Landesarchaeologe and the Gebietsreferent of Brandenburg, the result: the author of this letter is childish, 35 stones at February 13th in 2018. Now, today in 2022 it is so claer by 1500 stones, nobody needs these Experts to detect these unbelievable artifacts, which times ever.

First try ever to write a "scientific letter".
